Dear JISC,

Thanks you for your continued work on Joint Implementation. Our members are of the view that JI continues to play an important role in the future of our actions to combat climate change.

In view of our support for a new market mechanism which draws on both CDM and JI, we would like to express our support for the Secretariat's recommendation to adopt the CDM accreditation system and later unify the accreditation systems under a single system.

Best regards

Gareth Phillips
Chairman
Project Developer Forum
